NUREL

Deep knowledge and experience in textile

Originally built in 1967, it was acquired by SAMCA Group in 1999. NUREL's industrial premises, based in Zaragoza (Spain), are focused on Nylon 6 and 6,6 production. NUREL has state of the art Nylon filament production technology, positioning NUREL as one of the most reputed European Nylon manufacturers.

Our continuous reinvestment in R&D and our focus on quality, enable NUREL's products to be assigned to the most demanding markets and applications. NUREL production is totally integrated, our know-how is based on our experience in polymer chemistry, spinning techniques and draw-warping expertise.

Our aim is to keep developing high technology Nylon yarns to benefit the public end users without creating a footprint on our environment.

- State of the art Nylon technology.
- Vertical integration.
- Nurel is part of The SAMCA Group.

A woman with long, light brown hair is posing in a black, form-fitting bodysuit. Her hair is blowing in the wind, creating a sense of movement. The background is a plain, light gray. The text 'fibre production' is overlaid on the left side of the image.

The ultimate
textile revolution

NUREL

Leading innovation in Nylon

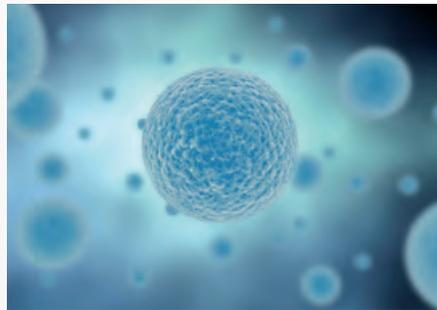

Research and Development are our means to exchange our team creativity, skills and experience into added value, competitive awareness and elements of progress.

Our R&D success is based on:

A clear orientation towards the market: We are convinced that we can only satisfy all of our customer's needs if we are able to understand their own market realities and conditions.

Processes improvement: We are committed to improve all our company processes with the latest innovations and to implement new technologies in order to expand our offer, improve our solutions and reduce costs.

Development of new products and technologies: We work towards the fibres of the future, through the incorporation of revolutionary technologies to textile processes, following the latest trends on nanotechnology, intelligent textile and functional fabrics.

NUREL has several means to reach for excellence on research and development activity:

- > Polymerization and Spinning Pilot Plants.
- > Worldwide University and Research Centers cooperation agreements.
- > Analysis Laboratory nets, equipped with the latest technology.
- > A wide multidisciplinary professional team at the service of research.

R&D is our essential future resource

After several years of research. Nurel introduces:
New vision in Body Care

Novarel Technology

Patented by NUREL

Thanks to its patented technology, NUREL is the one and only combining textile and body care. Novarel, the technology for the microencapsulation of active principles, is radically different from what has been done before. It uses very resistant special microcapsules that are porous and inert, containing active principles.

This technology allows NUREL to incorporate active principles into fibers, and hence into the fabric in a homogeneous way. During the garment use, principles are released very slowly, providing benefits to the skin, lasting 100 washes.

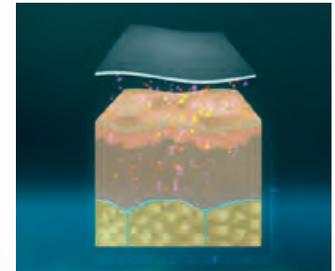

Active ingredients incorporated into the capsules

Capsules become part of the microfibre.

Active ingredients are protected and released in a controlled manner.

Capsules are activated whilst the garment is worn, releasing active principles into the skin.

Novarel incorporates pure active principles into the microfibre. Prime quality active ingredients:

Rose Hip Oil

Menthol

Sweet Almond Oil

Aloe Vera

Capsules are activated whilst the garment is worn.
Releasing active principles into the skin.
Feeling its benefits all day long.

Outstanding skin results declared by users.
Verified by prestigious international labs.
Hypoallergenic approved.
Lasting 100 washes.

Vitamin E

Essential oils

Caffeine

Retinol

Carotene

Cellulite Control.
Redefine & Tone
your body

Novarel is a trademark of NUREL

novarel[®] slim
.....

NOVAREL Slim is a Nylon micro-fibre which contains active principles in order to help the skin fight against fat accumulation and cellulite.

Thanks to the exclusive Novarel technology, anti-cellulite benefits are activated during the use of the garment.

Capsules last 100 washes.

High quality ingredients

It combines the best selection of active ingredients: Caffeine, Retinol, Ceramides, Vitamin E, Fatty Acids and Aloe Vera. Caffeine is a renowned active slimming agent that activates microcirculation and promotes fat destruction.

Scientifically proven results

Clinical study demonstrates:

Remarkable perimeter reduction*

65% efficacy reduction of fat nodes. Redensifying effect*

76% Slimming Efficacy*

WOMEN AFTER 28 DAYS OF USE **

State reduction on the orange peel aspect

63%

Feel their jeans less tight

67%

Feel lightness sensation

72%

* Clinical and ** Sensorial test undertaken on independent lab.

Caffeine

Retinol

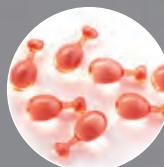

Vitamin E

Aloe Vera

Ceramides

Prime quality active ingredients incorporated into the micro-capsules
